 Re: Expiration Dating - Detect™ ScoV-2 Ag test kit

Dear Valued Customer,

The shelf life of the Detect™ ScoV-2 Ag test kit is currently 13 months due to the rapid and recent development of the product and adherence to regulatory requirements; however, the product continues to undergo real time stability studies. As test results permit, we expect to extend the expiration date of the product.

Below is a list of product lots that were shipped to your facility and have since had the expiration date extended beyond what is labeled on the kit box. The new expiration date is listed in the far-right column.

Lot #	Labeled Expiration	New Expiration
